

IN THE CLAIMS

Please amend Claim 7 as follows:

1. (Previously Presented) A portable electronic apparatus (1) whose housing (2) is provided with a housing part that is constructed as a lever element (3), which is arranged in a wall of the housing and is arranged to cover at least partly a battery pack, said lever element being arranged to bend a material of lower hardness, external to the portable electronic apparatus, by way of a leverage effect.

2. (Cancelled)

3. (Original) A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is arranged to open metal closures and is connected to the housing.

4. (Original) A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is made of metal and/or ceramic.

5. (Original) A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is constructed as an angled metal plate so as to cover a battery pack.

6. (Previously Presented) A mobile telephone (1) which includes a housing (2), whose housing (2) is provided with a housing part that is constructed as a lever element (3), which is embedded in a wall of the housing and is arranged to cover at least partly a battery pack, and said lever element being arranged to bend a material of lower hardness, external to the portable electronic apparatus, by way of a leverage effect.

7. (Currently Amended) A mobile telephone housing, at the rear of which there is provided a lever element (3) which offers protection against shocks and pressure and also protects ~~the~~an accumulator, whereby the housing (2) is provided with a housing part that is constructed as a lever element (3), which is arranged in a wall of the housing and is arranged to cover at least partly a battery pack, said lever element being arranged to bend a material of lower hardness, external to the portable electronic apparatus, by way of a leverage effect.
